

ADAMS Solution Guide

Bag & Tag

Crime Scene Physical Evidence Bag and Tag

The ADAMS Physical Evidence Bag and Tag solution (Bag & Tag) is a free application for the Apple® iPad®. Now crime scene investigators and first responders can document evidence on-the-spot while at the crime scene. No more handwritten notes, reports or labels. No more writing the same information over and over. Just one easy, intuitive application to bag, tag and document crime scene evidence.

Highlights

Enter case information. Users can enter case or incident number, crime type, date of report and response, type of evidence and address or location of crime. Address and GPS coordinates can be auto-filled reducing documentation time.

Document crime scene evidence. The investigator can document each piece of physical evidence using customized package types (gun box, latent envelope, sexual assault kit, etc.) along with agency-customized evidence categories and category-specific fields.

Type:
Description:

Highlights continued

Review property items. While still at the crime scene, the investigator can review each of the property items to make sure that complete descriptions and necessary details have been recorded.

Print property report. Upon return to the office, the user can print and review reports of the physical evidence gathered at the day's different crime scenes and take the opportunity to correct entries or to elaborate on observations.
