

PRESENTS: Digital Processing of Footwear Evidence LIVE and ONLINE

Foray Technologies is proud to announce its Footwear, three-day, hands-on training program in forensic digital imaging May 21 - 23, 2024. This class will be delivered LIVE and ONLINE.¹

During this **three-day Footwear** course, participants will review the fundamental digital imaging concepts and technologies and will be able to select basic the appropriate Adobe[®] Photoshop[®] processing tools and function. In addition, participants will gain a more in-depth experience with and knowledge of digital imaging processes as well as learn when these techniques should be used to aid in the **forensic investigative process**.

This **LIVE**, **online** training program will expand and improve participants' knowledge of and expertise using best practices for calibrating footwear, tire, and other impression evidence, suppressing background noise, adjusting tonal range and contrast, and much more. Participants will also learn how to use advanced methods to enhance complex impressions and optimize image quality and clarity. Participants must successfully complete practical exercises to demonstrate their knowledge of and their ability to use the tools and techniques taught. In addition, participants will learn how to create and use innovative procedures for preparing court exhibits that clearly illustrate the detailed analysis and comparison of impression evidence to a layperson in a readily--understandable manner.

Participants are encouraged to use some of their own images (in TIF or camera RAW format) so they utilize their newly learned concepts, tips and techniques in practical exercises using their own images! They will document, interpret and explain their image analysis process as well as describe the best practices for basic digital imaging concepts.

With more than 30 years of AFIS and forensic digital imaging experience, David Witzke (AKA Ski), is considered to be one of the foremost experts in forensic digital imaging technologies. Ski is an associate member of the International Association for Identification (IAI), the European and several regional divisions of the IAI; the Canadian Identification Society (CIS); and the European Network of Forensic Science Institutes Fingerprint Working Group (ENFSI FWG), where he has also been elected to serve on the ENFSI FWG Steering Committee; and Ski is the chairperson for the Digital Evidence Subcommittee for the IAI.

Ski is a contributing writer for three well-known forensic books: *Crime Scene Photography* (Third Edition, published 2016 by Academic Press), *Introduction to Crime Scene Photography* (Published 2012 by Academic Press) and *Footwear, The Missed Evidence* (Third Edition, published 2013 by Staggs Publishing). (*Crime Scene Photography* has been chosen by the IAI certification committees for the Certified Crime Scene Investigator (CCSI) Certification Test, the Certified Crime Scene Analyst (CCSA) Certification Test, the Certification Test, and the Forensic Photography Certification Test.)

¹ Participants must attend all three days of training. It is also recommended that each person attending this program have at least a basic understanding of the Microsoft Windows 7 or 10 operating system. In addition, participants should, at a minimum, have a basic familiarity with Adobe Photoshop.

What:	Footwear Digital Imaging	
Where:	ONLINE	
When:	May 21 – 23, 2024	
Time:	10:00am - 6:00pm, EST each day	
Cost:	\$799.00 per attendee

*REQUIREI	MENTS LISTED ON NEXT PAGE	*
Attendees must have a cur	rrent Adobe Photoshop Creative Cloud	d subscription.

Computers must meet these minimum requirements:

Windows

Minimum requirements:

Processor: Intel® or AMD processor with 64-bit support*; 2 GHz or faster processor (NOTE: faster processor speeds

provide support for a number of functions, including Camera RAW processing, Calculations, Pattern Removal Filter, etc.)

Operating system: Microsoft Windows 10*** October 2018 update (64-bit) version 1809 or later

RAM: 8 GB or more of RAM (NOTE: Adobe Photoshop CC 2020 is a RAM-intensive application. More is better!)

Graphics card: nVidia GeForce GTX 1050 or equivalent; nVidia GeForce GTX 1660 or Quadro T1000 is recommended

(NOTE: Please be advised that any other video card creates problems such as resampling, aliasing, etc.)

Hard disk space: 3.1 GB or more of available hard-disk space for 64-bit installation; additional free space required during

installation (NOTE: You cannot install Adobe Photoshop CC 2020 on a drive that uses a case-sensitive file system!)

<u>Monitor resolution</u>: 1280 x 800 display (OR HIGHER) at 100% UI scaling with 16-bit color and 2 GB or more of dedicated VRAM

OpenGL: OpenGL 2.0-capable system

Internet: An Internet connection and registration are necessary for required software activation, validation of subscriptions, and access to online services.

*Laptops must have an external mouse (Using the laptop touchpad is totally and completely unacceptable).

*Each user must have internet access and must run Zoom on their computer. (This allows the instructor to assist the user

during hands-on exercises.)

*Each user must have access to and create a free account on WeTransfer.com. This requirement allows participants to transfer non-compressed versions of the images created during hands-on exercises; the file size for a majority of these images exceeds the capacity of most email systems. <u>NOTE</u>: Users must have access to WeTransfer.com at least one week prior to the start of class as well as during the class.

*Each user must have an individual webcam with a microphone, and each laptop must be equipped with speakers. Alternatively, users may find it advantageous to use a headset that includes a microphone instead of using the microphone on the webcam and using the laptop speakers. Using a headset that includes a microphone also eliminates a lot of problems caused by speaker (sound) "feedback".

Attendees must have a current Adobe Photoshop Creative Cloud subscription.
